

**DISTINGUISHING BETWEEN DEVICES OF DIFFERENT TYPES IN A
WIRELESS LOCAL AREA NETWORK (WLAN)**

ABSTRACT OF THE DISCLOSURE

A method and system for distinguishing between devices of different types (e.g., mobile and stationary devices) in a wireless local area network (WLAN) in order to provide additional services to one or the other. The method includes obtaining a device type for the terminal, and providing specific services to the terminal if the terminal is a device of a certain type.
